

## PIN FY19 AML Proposals

### Cresta AML site

T23N, R5E, Sec 14 SW

N39°50.569', W121°23.721'

Access via Hwy 70 to Caltrans/PG&E Cresta Roadside Rest area. Across from the rest area is a locked gate that climbs ¼ mile up to a large flat with on the side of a ravine. PG&E key needed or walk in.

This site consists of 3-4 adits, some of which are cut square and not the normal arched appearance.

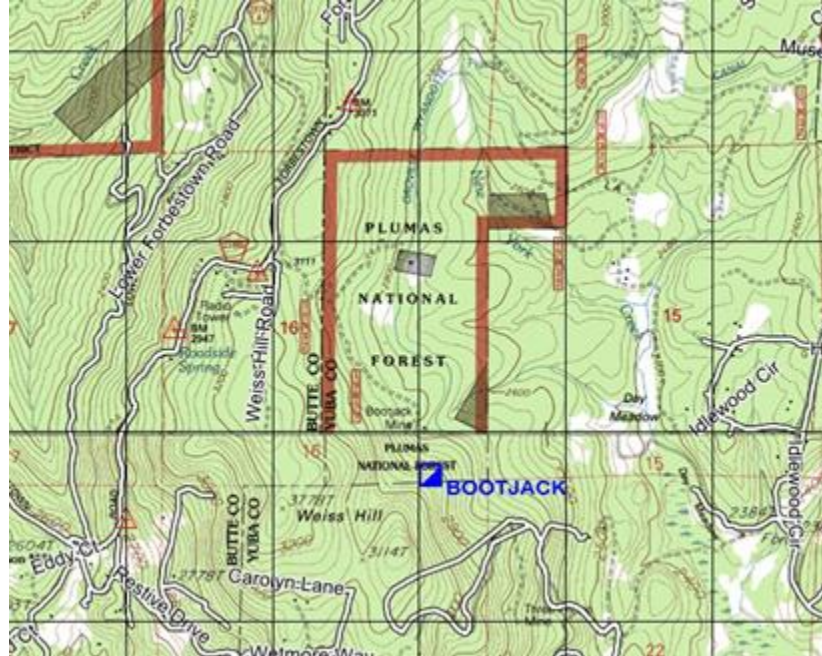

Recommended method of closure is either a bat gate or a foam plug.

# Bootjack adit AML Site

T19N, R6E, Sec 16 near south line

N39°29.899', W121°17.933'

Access via Forbestown's roadside spring just above Robinson mill, thru a locked gate up onto Weiss Ridge and then over to the old mine, or via the 19N32 road that feels like a private driveway.

The site consists of an incline shaft approx. 8'x20'

Recommended closure method is either fencing or a foam plug.

## Swift Sure AML Site

T22N, R10E, Sec 20 NW-NE

N39°40.862', W121°00.282'

Access via the Gibsonville – Johnsville road and park just before Whiskey Creek. Walk uphill to the dry waterditch and contour around to the NE. The adit is located at the inside edge of the old ditch.

Site consists of an adit which is located at the inside edge of the old water ditch.

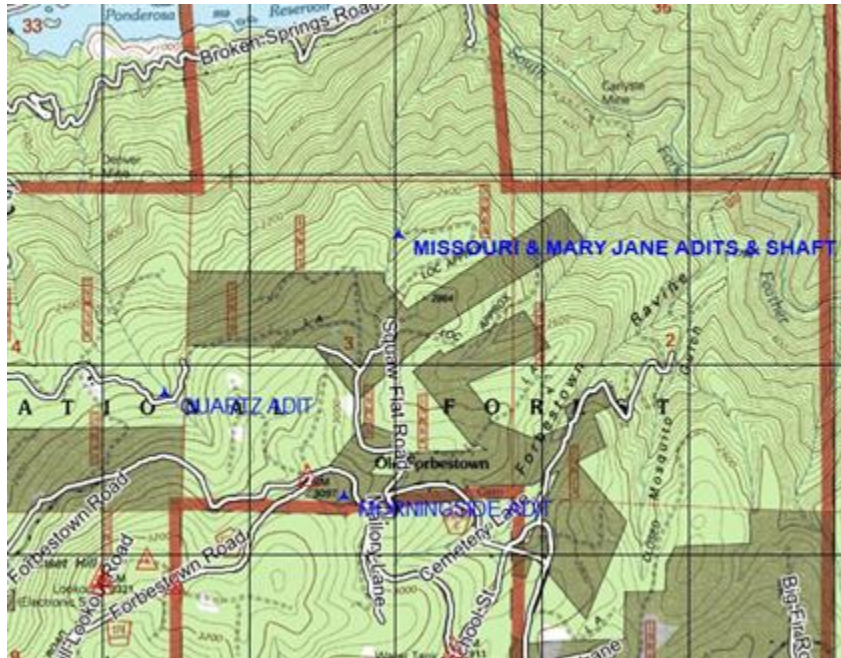

Recommended method of closure is either a bat gate or a foam plug.

## MISSOURI & BETTY JANE AML Site

T19N, R6E, Sec 3

N39°32.358', W121°16.981' and N39°32.379', W121°16.995

Access via paved Old Forbestown Road to the 19N33 Road or Squaw Flat Road, continue past the Geraldine claim, then drive down thru David Doran's property on the 19N48 Road to a USFS gate, then across a private 10 acre parcel to the USFS parcel which is soon to be masticated and down to mine.

Site consists of both a shaft and adit

Recommended method of closure is either a bat gate or a foam plug.
